of EDINBURGH

Learning about AI: Digital Twin activity

Resource Pack Cover Sheet

Authors: Dr Pawel Orzechowski and Elaine Mowat, University of Edinburgh

Digital Twin is an activity to support learning about AI through using AI. Students have conversations with 'made up AI people' to explore the possibilities and risks of various AI tools and prompts. Students then have conversations with each other to reflect on and share their experiences.

This pack contains the following:

- Digital Twin: What it is and how it works (pptx; pdf)
- Digital Twin: Example instructions (docx; pdf)

Background

The resource was originally created for the course 'AI for Care in the Digital Age', part of a Masters level programme at the University of Edinburgh. It has been developed for use as an Open Education Resource (OER) and is suitable for use across a range of age groups and contexts. You are welcome to make any changes to the resources according to your needs.
